#### **EXAMINER'S AMENDMENT**

1. Applicant's election without traverse of Group I, claims 1-4, 6-10, 12-18, and 20 in the reply filed on 4/15/04 is acknowledged.
2. Claims 5, 11 and 19 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 4/15/04.
3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Cancel claims 5, 11 and 19.

4. The following is an examiner's statement of reasons for allowance: the prior art does not teach or fairly suggest, in a method of making a vehicle pull handle assembly by overmolding using an injection molding process, the steps of injection molding a pull strap portion which has a first pivot joint member, and overmolding a base, which has a second pivot joint member, onto the pull strap portion, such that the second pivot joint member pivotally mates with the first pivot joint member, but does not chemically bond thereto. The prior art also does not teach or fairly suggest the steps of injection molding a base portion which has a first pivot joint member, and overmolding a pull strap portion, which has a second pivot joint member, onto the base portion, such that the second pivot joint member pivotally mates with the first pivot joint member, but does not chemically bond thereto. Close prior art is DE 29712357, which teaches a handle (20) which pivots by mounting recesses (18) which snap onto bearings (30, 40), as opposed to being pivotally mated by injection overmolding. Corrion et al. (US Patent 6,468,457) teaches a method of forming a vehicle cup holder arm by injection overmolding to form an arm cup (84) which is pivotal with respect to a base (72). There is no motivation to combine these references.

Art Unit: 1732

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

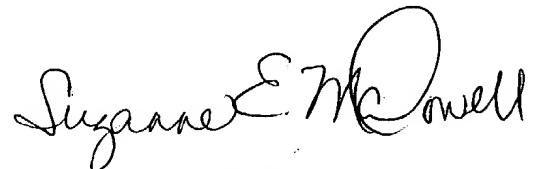

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Epp et al. (US Patent 6,594,864) was filed after the filing date of the instant application, but is of interest.
